Objectives and rationale of the KH

The ALiSEA KH aims to become the **leading knowledge resource** on agroecology in the Mekong Region. It seeks to **facilitate knowledge-sharing** and **increase the visibility** of local and national experience and insights. By promoting a diverse range of knowledge, the hub aspires to **inspire stakeholders and foster networking** among all actors interested or involved in agroecology.
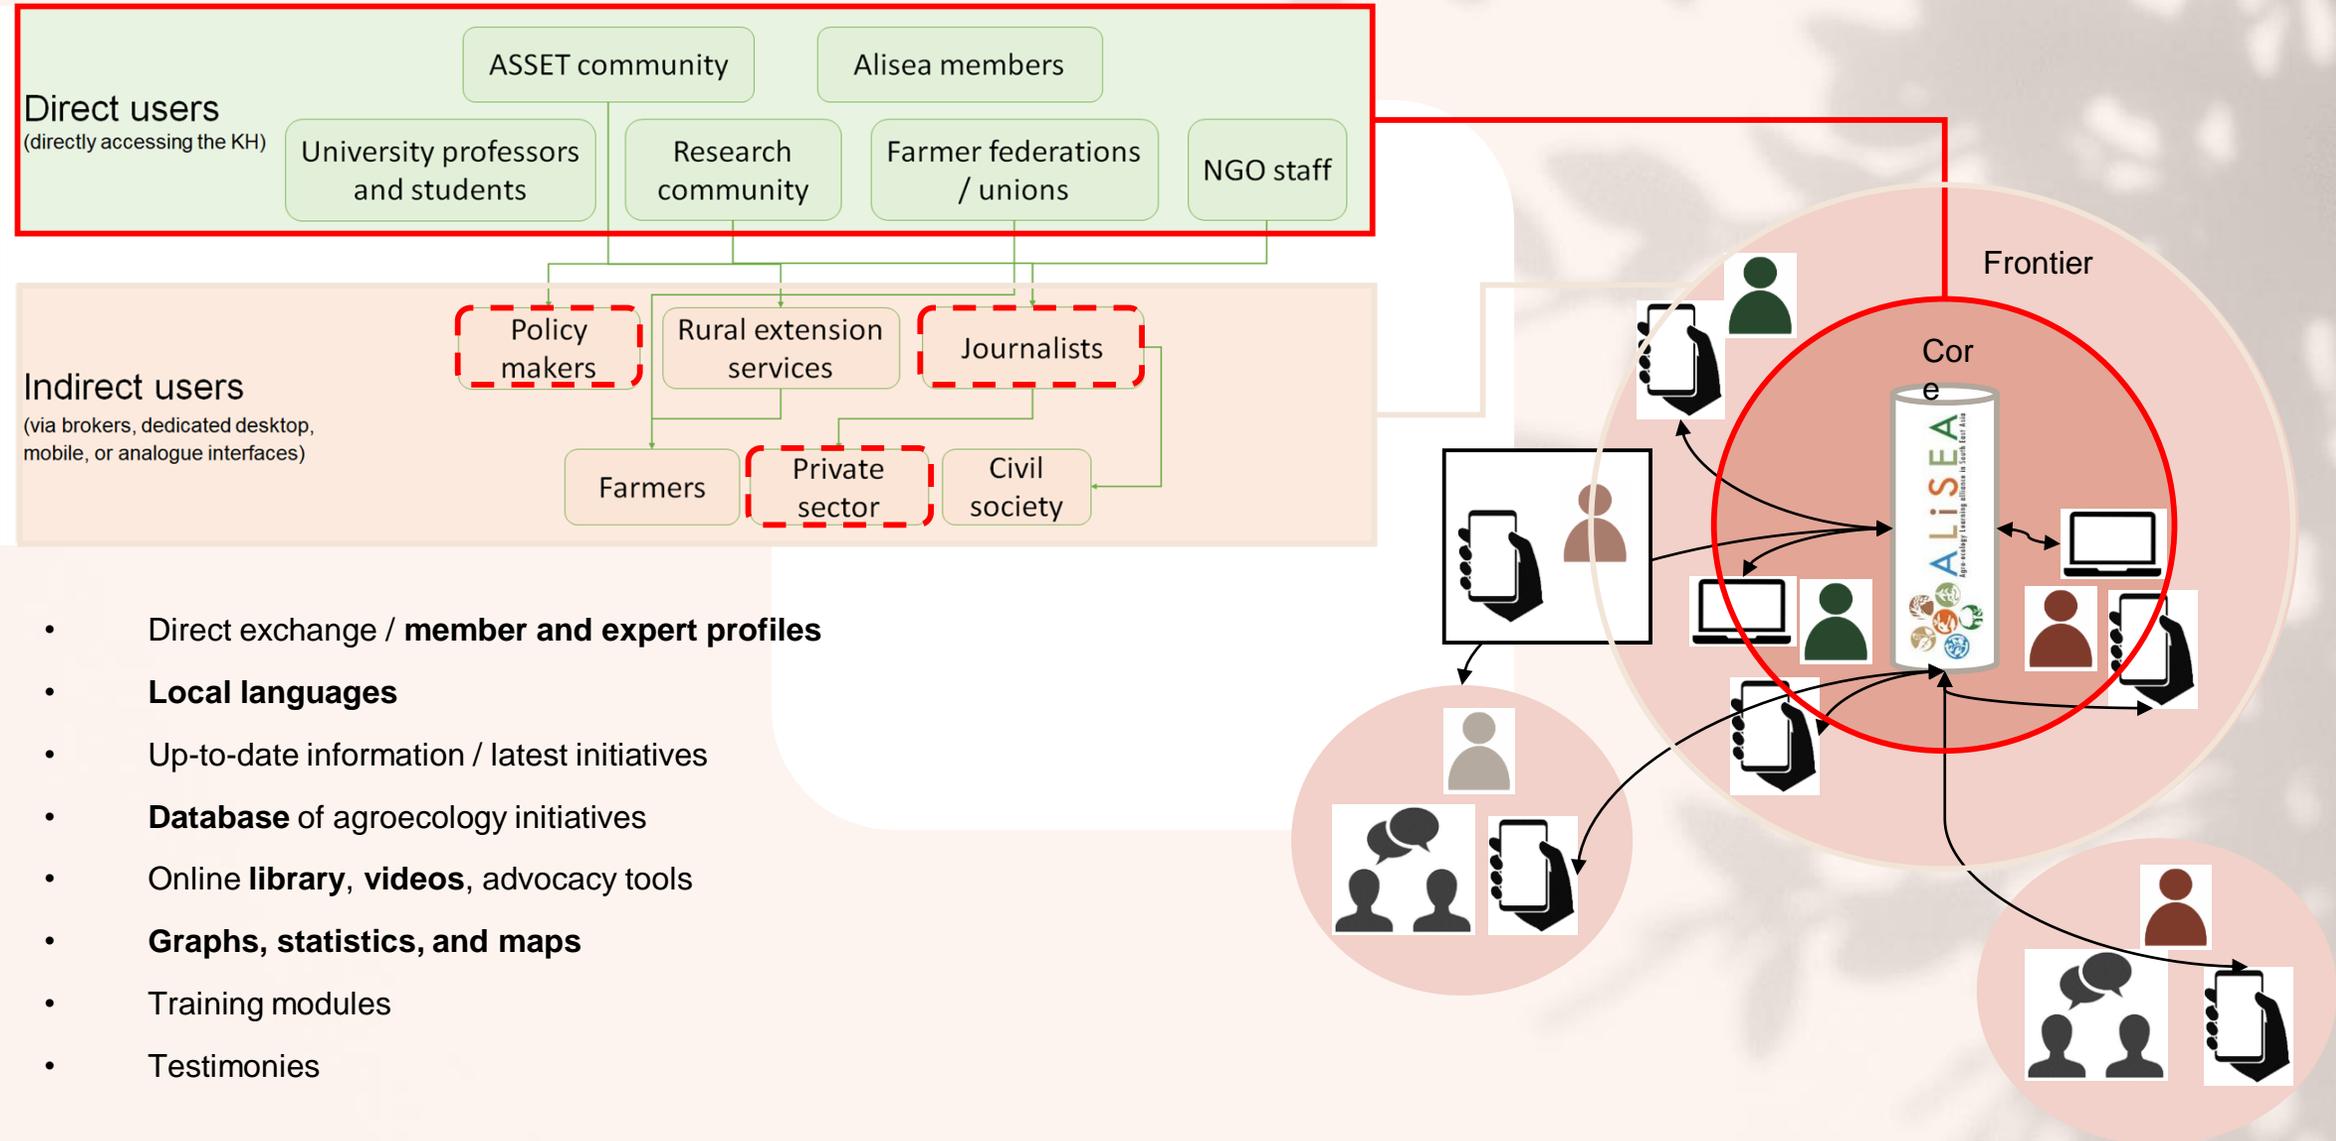

Knowledge Hub

Website

ALiSEA KNOWLEDGE HUB
ALiSEA

ALiSEA
Knowledge Hub

The essential digital gateway to data, information and knowledge on agroecology in Southeast Asia.

Inspiring stakeholders to promote and adopt agroecological practices.

- NGO staff

Indirect users
(via brokers, dedicated desktop, mobile, or analogue interfaces)

- Policy makers
- Rural extension services
- Journalists
- Farmers
- Private sector
- Civil society

Frontier

Core

- Direct exchange / **member and expert profiles**
- **Local languages**
- Up-to-date information / latest initiatives
- **Database** of agroecology initiatives
- Online **library**, **videos**, advocacy tools
- **Graphs, statistics, and maps**
- Training modules
- Testimonies

Developing the Knowledge Hub

1. Conceptual Development

Needs of

Beneficiaries and

Users

Existing Agroecology Platforms

Complementarity with ALiSEA Website

Existing data and information

Semantic layer

2. Technical Development

External development outsourced to consultants specialised in CKAN & WordPress. Terria used for Map Explorer, customized by CDE

Demonstration of the KH

https://kh.ali-sea.org/

ALiSEA
Knowledge Hub

The essential digital gateway to data, information and knowledge on agroecology in Southeast Asia.

Inspiring stakeholders to promote and adopt agroecological practices.

Challenges and perspectives

Past challenges
* Harmonizing expectations towards the KH
* Multi-language platform
* Achieving a coherent, consistent, and relevant categorisation of knowledge products

Upcoming challenges
* Moderation of the KH on the medium to long term
* Creation of good quality and relevant content
* Technical development (for example interactive forum)

Perspectives
* The development team is still available through a new project funded by SDC
* Gradual handing over of technical development, moderation, and content creation to ALiSEA

Strategic directions for the KH

- Enhance platform maturity and digital services

- Strengthen content creation and knowledge sharing

- Establish sustainable management and maintenance systems

- Promote ownership, visibility, and partnerships

- Foster a user-driven, dynamic knowledge ecosystem

Current and upcoming activities

- Develop production guidelines for each type of knowledge product.

- Establish a standardized workflow for content creation, review and publication

- Finalize a data entry guideline for national KM coordinators

- Define selection criteria for materials to be uploaded to the KH

- Develop a KH strategy, roadmap, and action plan.

Conclusion and takeaways

Why designed an ALiSEA Knowledge Hub?

- Open access online platform
- Consolidate and share resources, expertise and practical information on AE
- Gather knowledge on agroecology in national languages from the Mekong region
- Increase visibility of local and national experience and initiatives
- Promote diverse range of knowledge

How to contribute to the Knowledge Hub?

INSIGHTS
Call for Knowledge products developed by members
Call to develop new KP using AliSEA format and process

DATABLOG
Share your research findings via visual and interactive ways

LIBRARY
Share all available resources on AE (study, report, poster, ptt, article, training materials, tools

EXPERTS
Share your research findings via visual and interactive ways

Discussion questions

Group	Question	Facilitator
1	How we attract users and sustain regular visits (Which channels –newsletter, separate FB page for KH promotion…? Why?)	• Ms. Trang
2	What are the main challenges faced by your organization in term of knowledge management (time, skills, human resources…) and how could ALiSEA support?	• Mr. Sơn
3	What is your organization's experience in ensuring the quality and reliability of knowledge products? (For example, through editing, internal review, peer review, or expert validation. What lessons or practices could be shared with other ALiSEA members and the Knowledge Hub?)	• Ms. Hằng
